

# Unlock the 3+1 Superpower for a Dream Salary

Department of Biotechnology and Pharmaceutical  
Technology (DBPT) @ YUMT

Initialization Complete. Status: Graduation = Employment.

# The Trillion-Dollar Engine is Accelerating

The biomedical sector is Taiwan's next major national focus. Market demand for pharmaceuticals and health-application biotechnology is experiencing massive, sustained growth.

**NT\$ 775  
Billion**

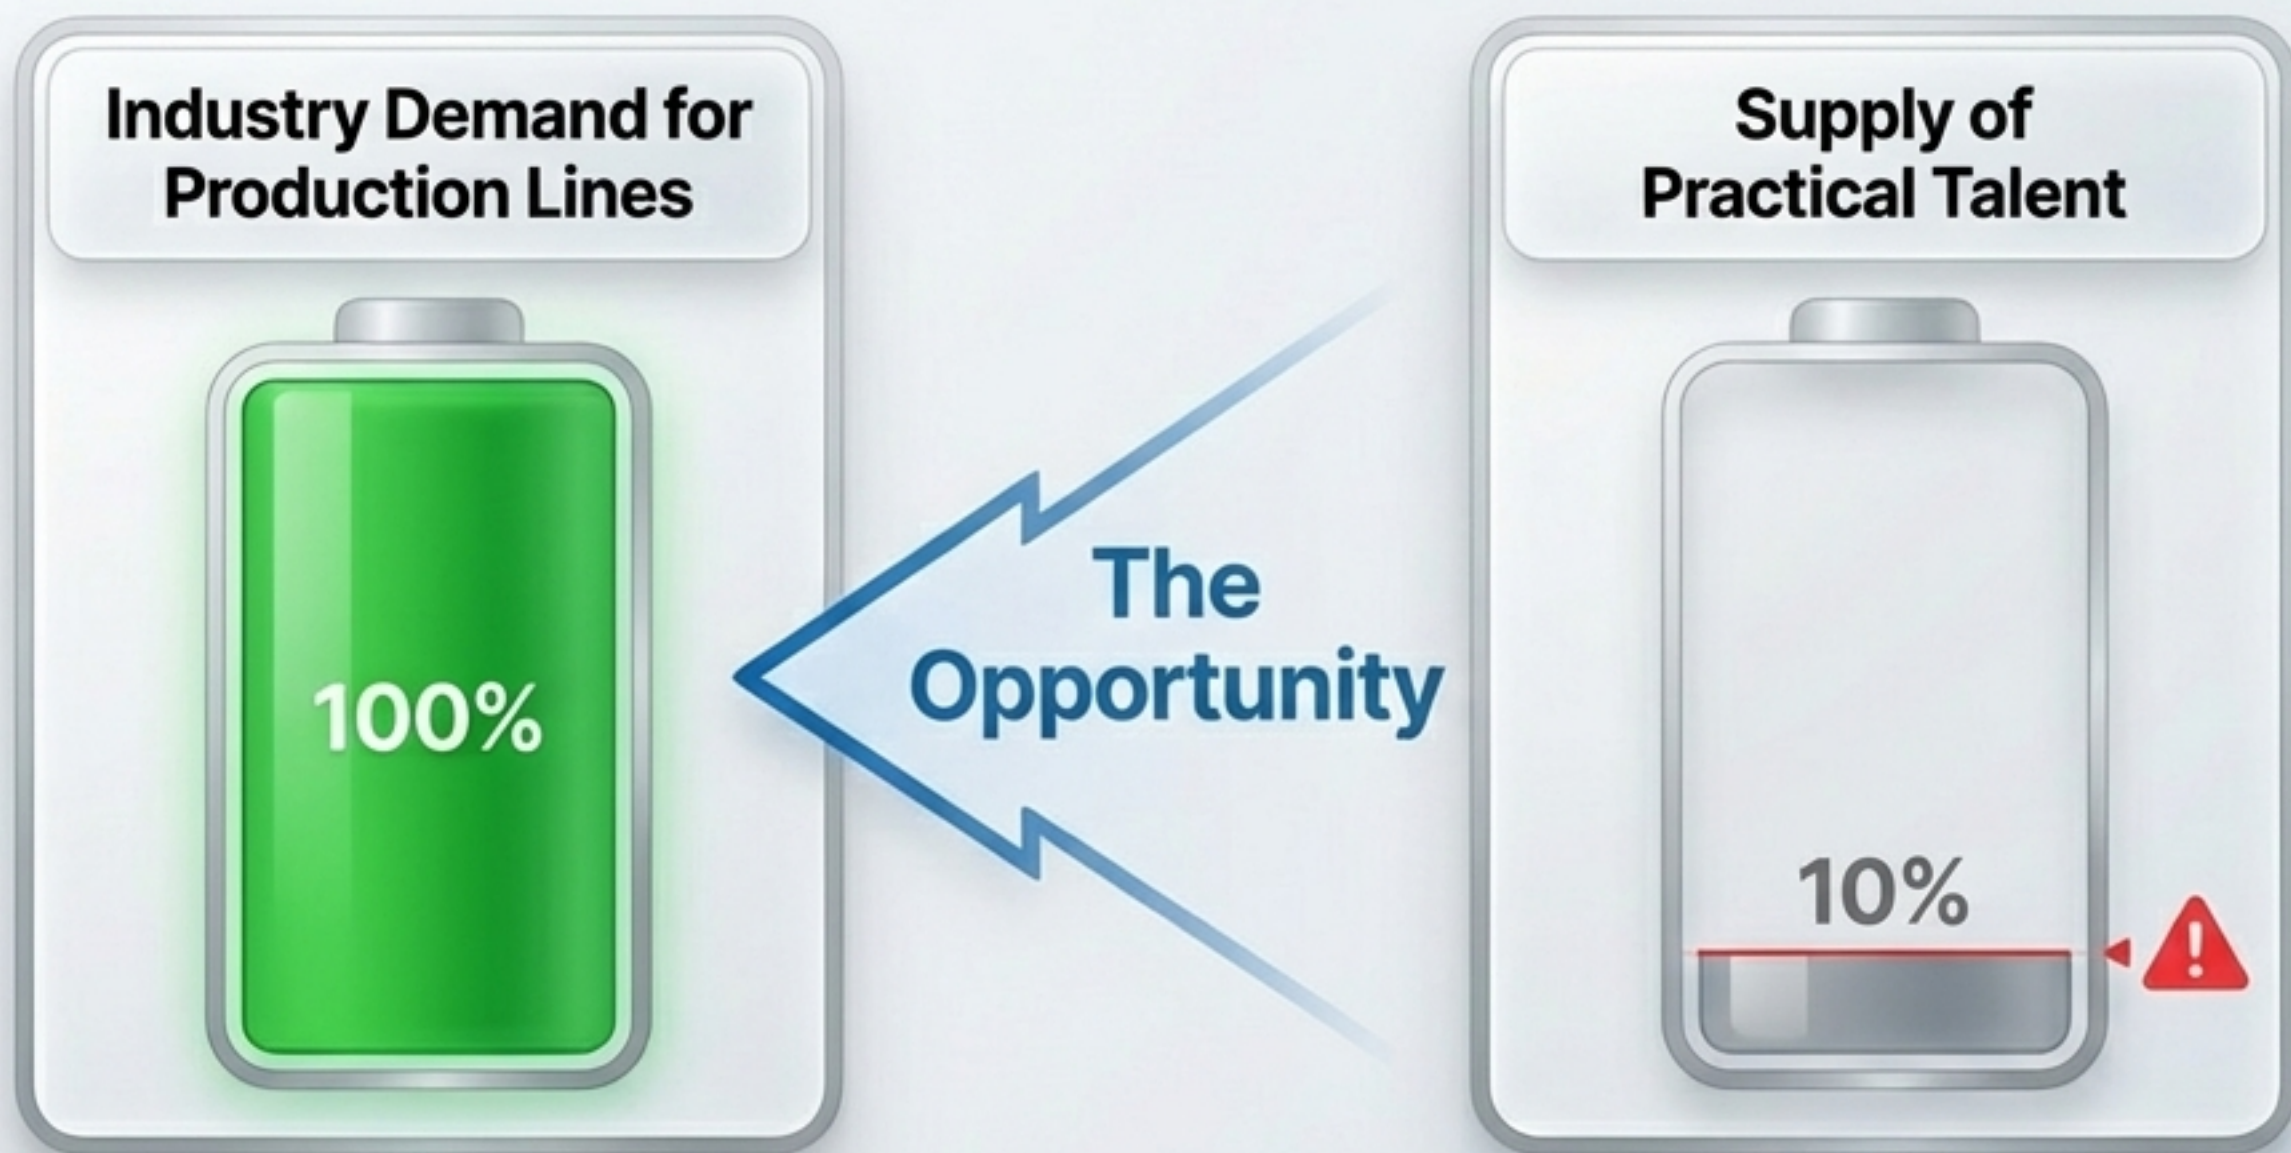

**Taiwan's 2024  
Biomedical Output.**

**The Next  
Trillion-Dollar Engine.**

# System Alert: The Golden Talent Gap

Pharmaceutical and health food factories are expanding, but they face a severe shortage. They desperately need practical talents who can operate on the production line immediately. This gap is your golden opportunity.

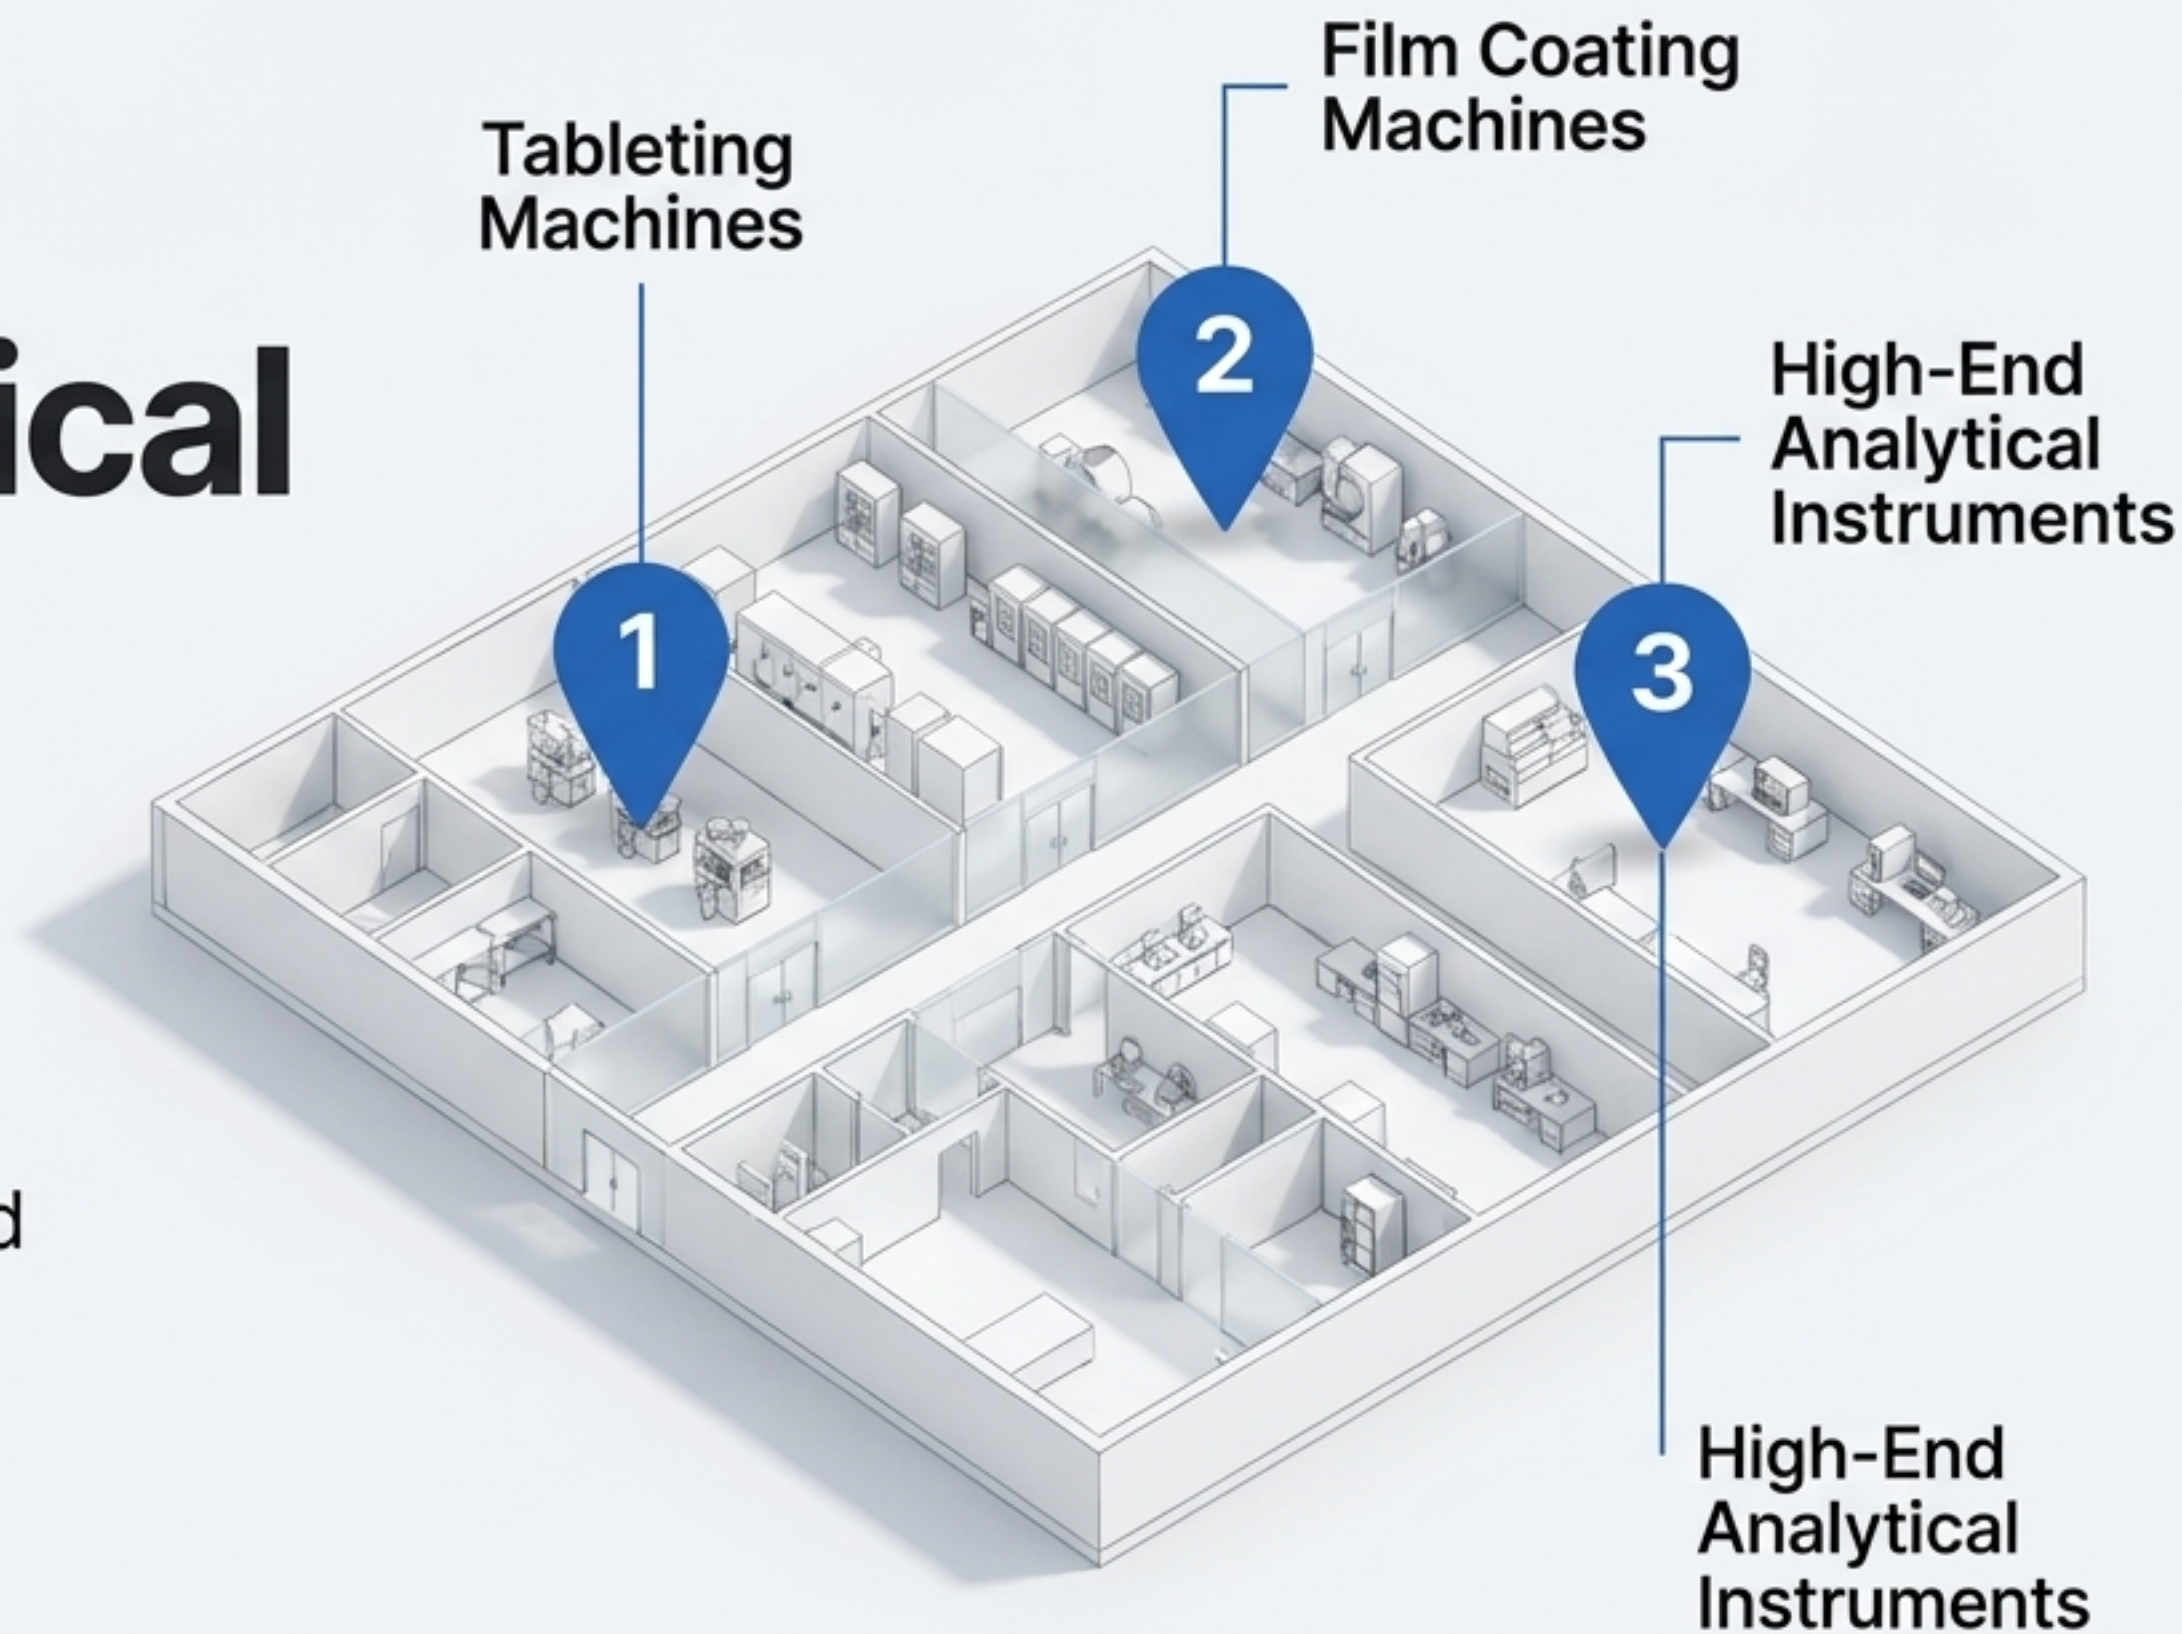

# Installing Your Dual-Core Advantage

DBPT is a rare powerhouse in Taiwan. We upgrade your skill tree with a dual focus: mastering both biotech theory and the hard manufacturing techniques for drugs and cosmetics. You graduate with hardware others lack.

# A Live Pharmaceutical Factory on Campus

We invested tens of millions to build Taiwan's most fully-equipped cGMP Drug Production Center. Familiarize yourself with real pharmaceutical factory specifications while still in school.

# Downloading Practical Skills

Reject rote learning. Our courses are designed for hands-on experimentation. Get your hands dirty making medicines and skincare products, saying goodbye to boring pure theory.

**Powder Science**

**Dosage Form Design**

**Cosmetic Formulation**

# Diagnostic: The Fast-Track vs. The Standard Path

Why settle for the standard build when you can fast-track your career?

## Standard Degree

**Focus:** Theory-Heavy

**Equipment:** Standard School Lab

**Year 4 Activity:** Sitting in Class

**Graduation Status:** Anxious Job Hunting

## DBPT 3+1 Fast-Track

✓ **Focus:** Dual-Core (Biotech + Pharma)

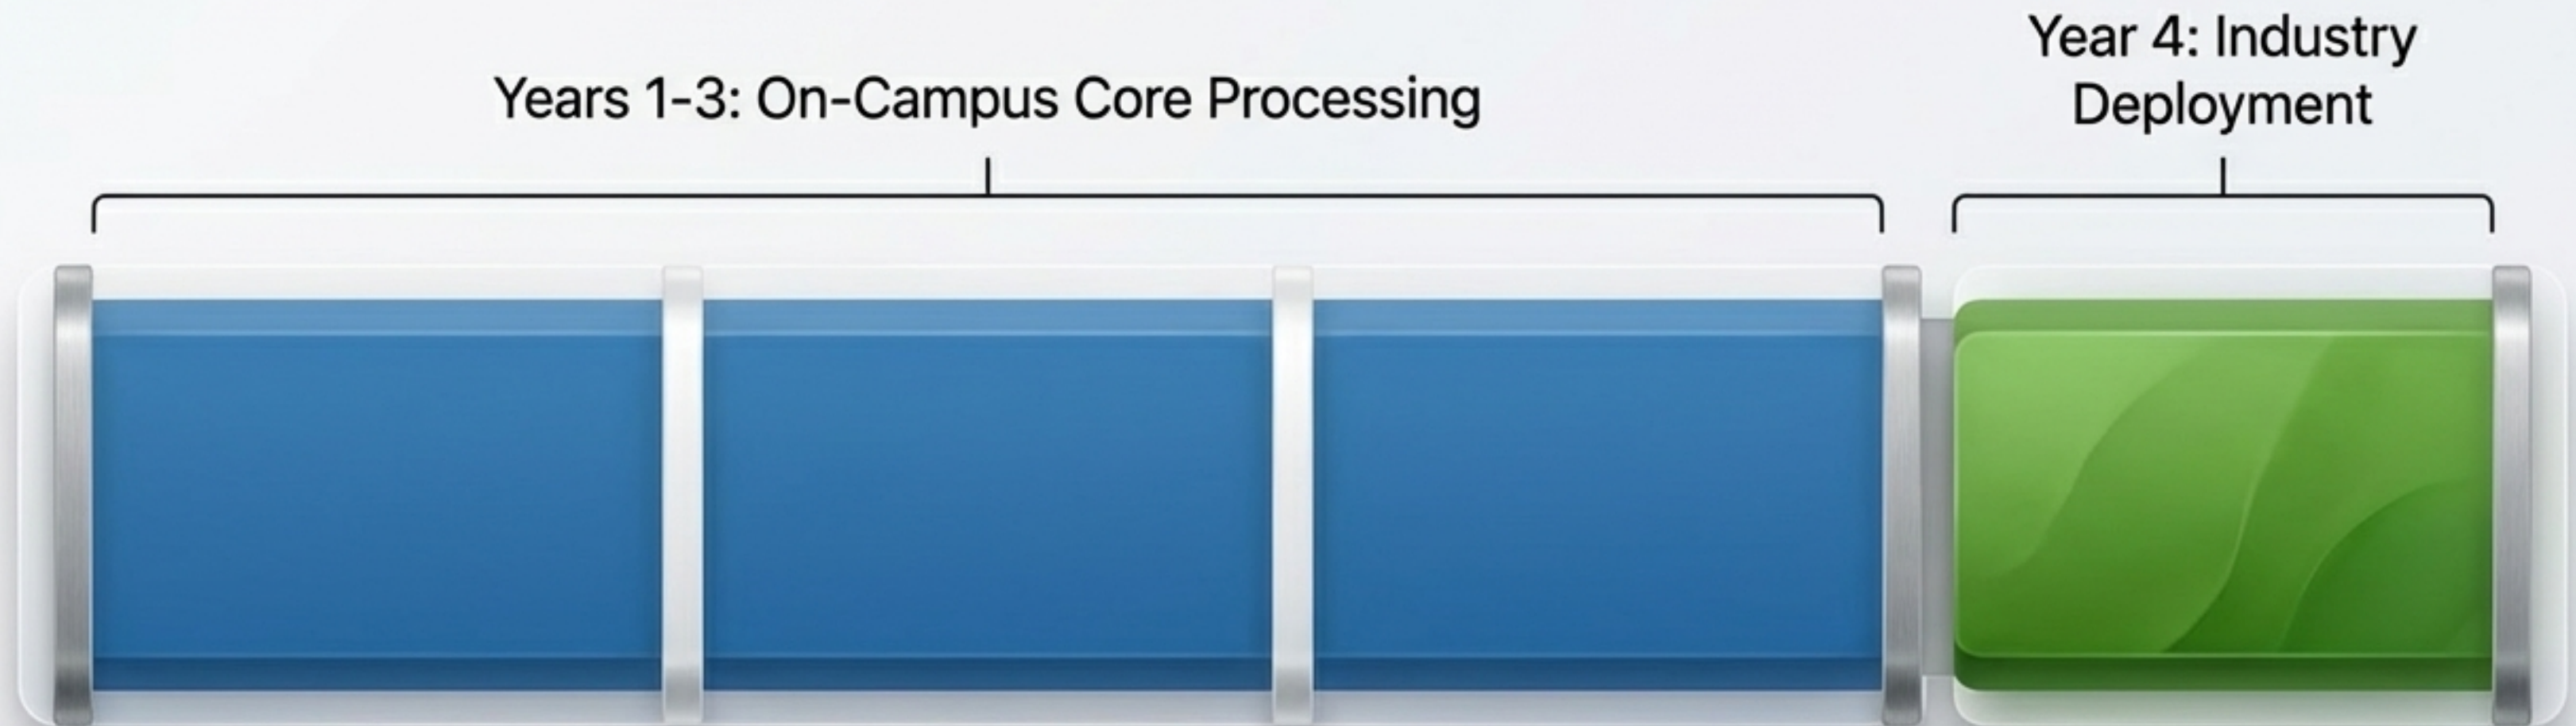

✓ **Equipment:** cGMP Drug Production Center

✓ **Year 4 Activity:** Paid Industry Internship

✓ **Graduation Status:** Job Ready +  
Accumulated Seniority

# The 3+1 Learning Blueprint

Lock in your future early. Three years of intensive on-campus training, followed by one full year of an industry internship in your senior year to secure your spot.

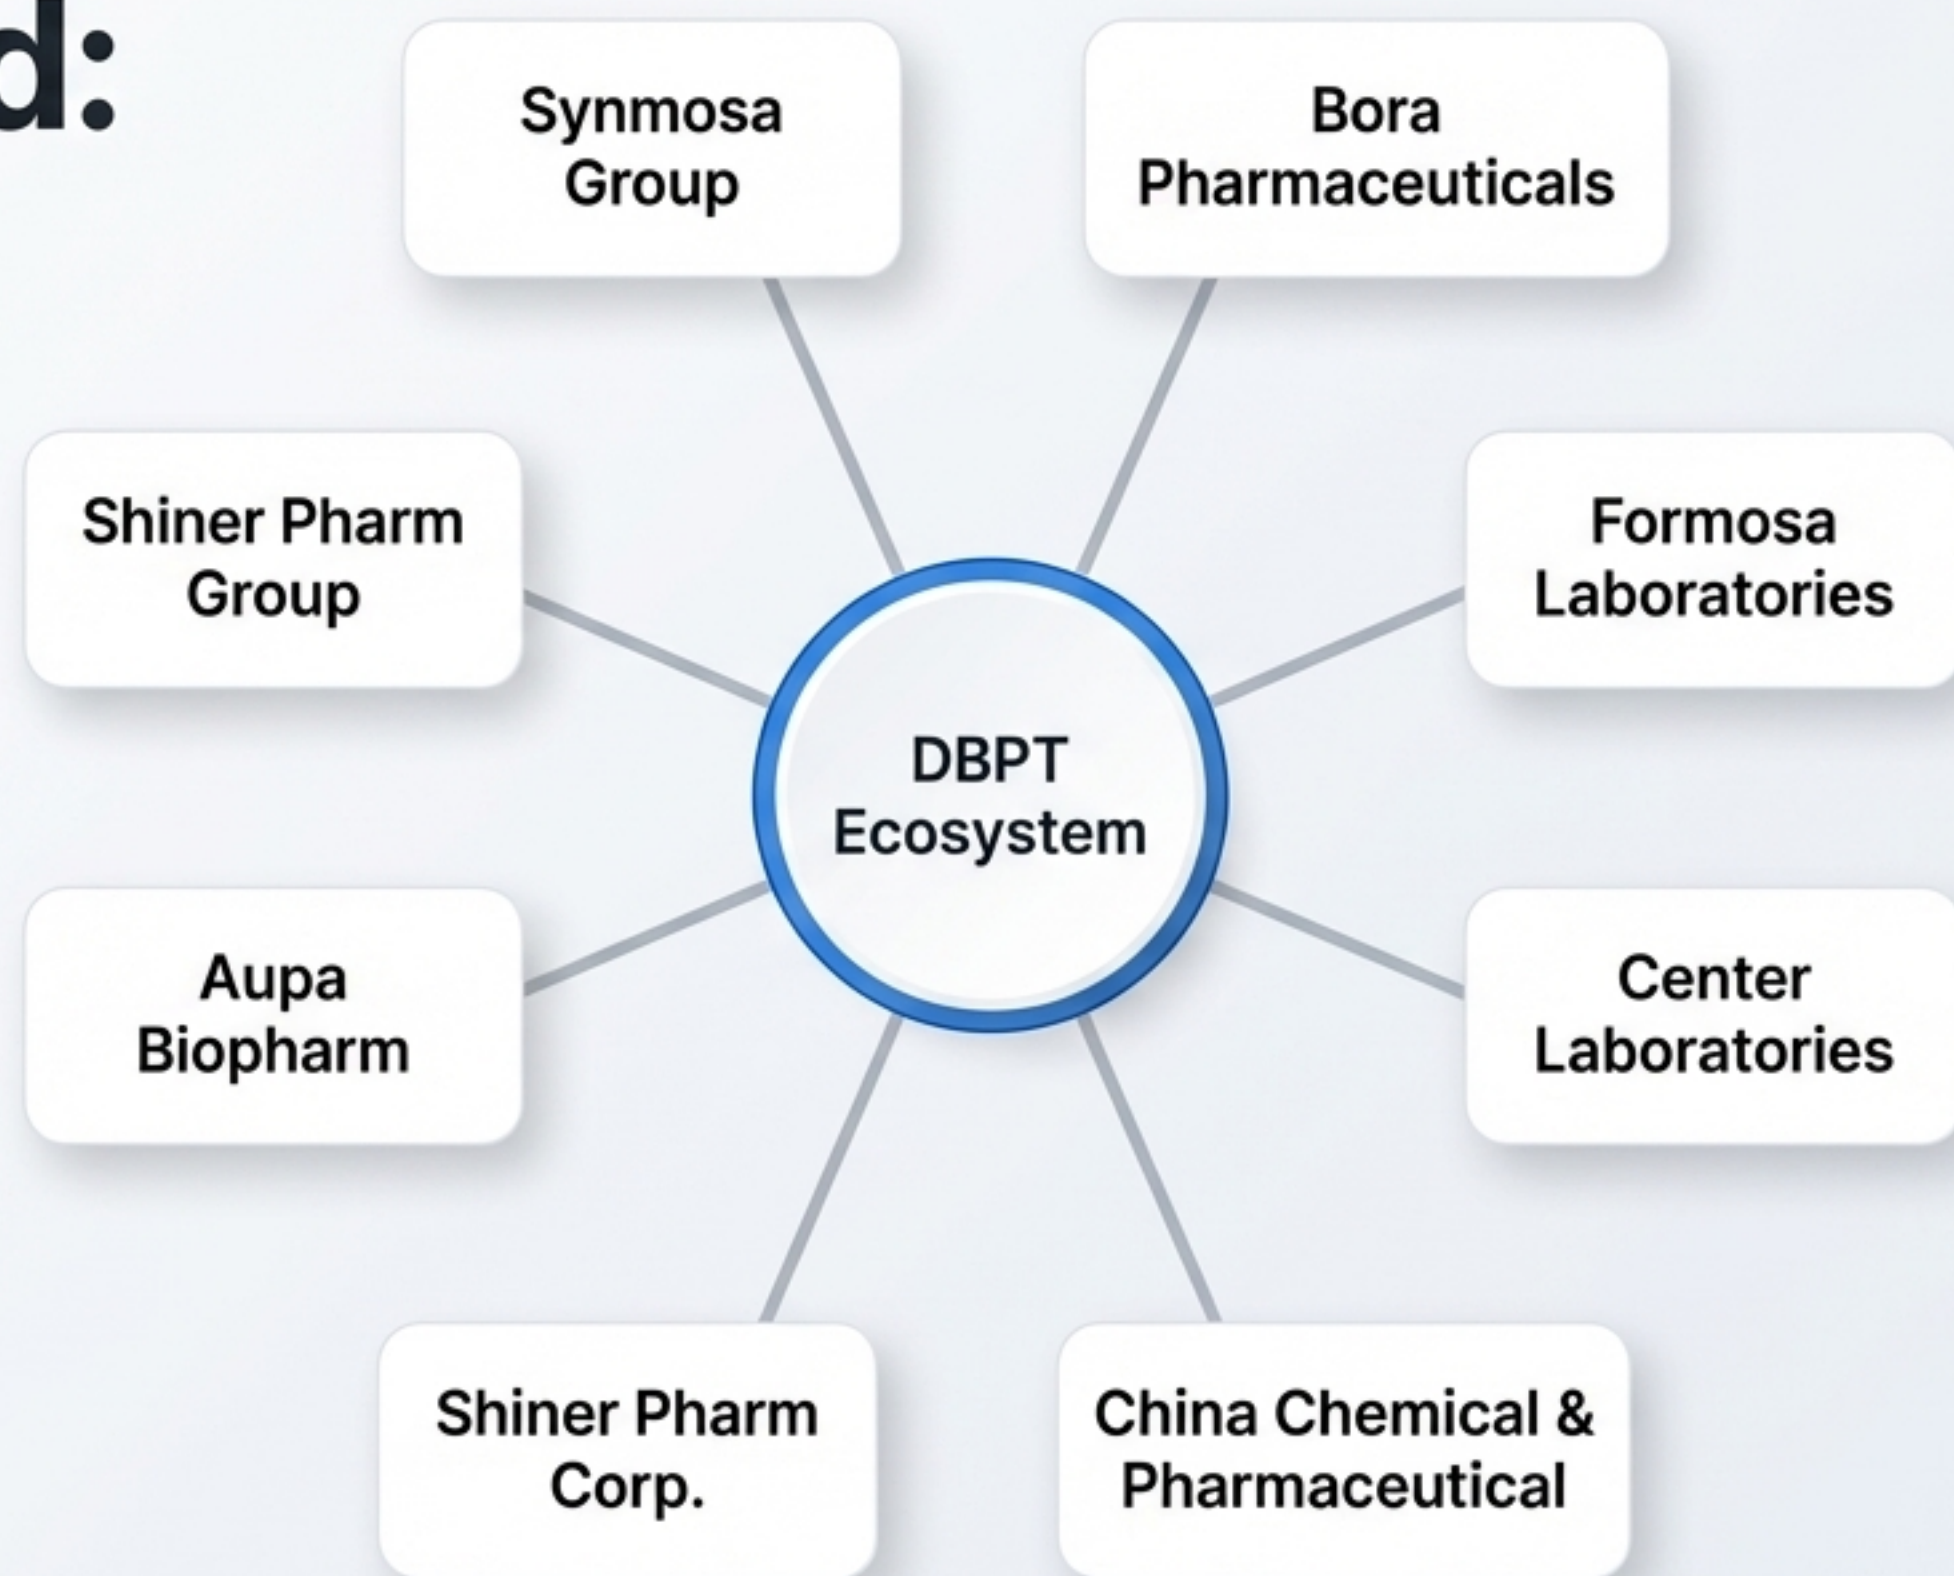

# Calculating Your Early ROI

This is not free labor. Our internships are true management associate training. Earn a real wage while you learn, and if you stay with the corporate group, your internship time counts directly toward your seniority.

# Access Granted: Our Super Teammates

Plug directly into Taiwan's most powerful biopharma ecosystem. Our partner network consists entirely of well-known, listed major parton major pharmaceutical companies.

# Executing the Seamless Transition

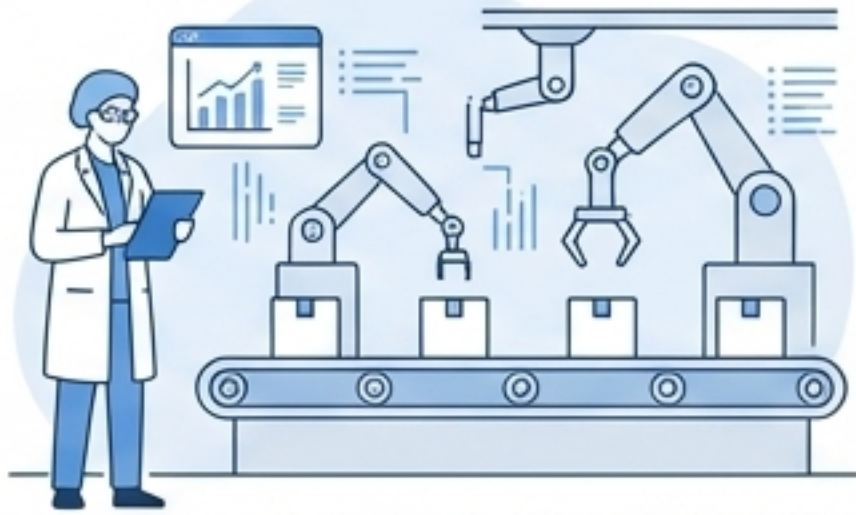

Eliminate post-graduation anxiety. With good internship performance, you transition directly into the original unit or an affiliated company. The result is by design, not by chance.

# Your Future is Boundless

DBPT graduates conquer all core areas of the biopharma industry.

**Choose your path** and command your future.

## Biotech & Pharma Manufacturing Personnel

**Role:** Process Engineer

**Stats:** Master of production, scale-up, and efficiency.

## Biotech & Pharma Service Personnel

**Role:** QA Technician

**Stats:** Master of quality assurance, inspection, and safety standards.

# Ready to Initialize?

Exclusive support for foreign high school students. We have the scholarships and counseling networks in place to help you seamlessly boot up your university life in Taiwan. Start your journey today.

- ✓ Comprehensive Admission Scholarships
- ✓ Foreign Student Counseling Mechanisms
